PROFESSIONAL SUMMARY

Results-oriented Senior Systems & DevOps Engineer with **15+ years of enterprise IT experience** spanning Linux/Windows infrastructure, Docker containerization, network administration, Python workflow automation, and modern AI/LLM integration. Proven track record managing high-availability environments, automating enterprise CRM systems (Bitrix24), and deploying asynchronous microservices. **Already residing in Bangkok, Thailand**; immediately available for in-person interviews and full-time on-site/hybrid employment with zero relocation cost or wait time. English B1 working proficiency.

CORE TECHNICAL SKILLS

Operating Systems & Infra:	Linux (Ubuntu, Debian, RHEL, CentOS), Windows Server (2012–2022), Active Directory, Hyper-V, VMware, Systemd, Backup & Disaster Recovery
DevOps & Containers:	Docker, Docker Compose, Containerization, CI/CD pipelines, Nginx (Reverse Proxy, Load Balancing, SSL/TLS), WireGuard VPN, OpenVPN
Networking & Security:	TCP/IP, DNS, DHCP, VLAN, Firewalls (iptables, UFW), Routing, NAT, Cisco, Mikrotik RouterOS, IP Telephony (SIP / Asterisk)
Python & Automation:	Python 3 (asyncio, FastAPI, aiohttp, aiogram, Telethon), Bash scripting, PowerShell, REST APIs, Webhooks, n8n, Make
Databases & CRM:	PostgreSQL, MySQL, MS SQL, Redis, Bitrix24 (On-Premise & Cloud Administration, REST API, Automated Workflows, Robots)
AI & Workflow Integration:	OpenAI API, Google Gemini API, Claude API, Whisper Speech-to-Text, Prompt Engineering, RAG Pipelines, Automated Data Extraction

PROFESSIONAL EXPERIENCE

Sayama Travel — AI Automation & IT Infrastructure Engineer

Thailand (Bangkok / Pattaya) | Nov 2022 – Apr 2026

- Administered core **Linux and Docker server infrastructure**, ensuring 99.9% service availability, automated snapshot backups, and secure WireGuard site-to-site VPN across branch locations.
- Architected enterprise automations for **Bitrix24 CRM**, configuring custom robotic rules, webhooks, multi-channel customer intake, and VoIP telephony routing.
- Engineered an automated voice-message processing pipeline utilizing **OpenAI Whisper** to transcribe audio messages into actionable text and attach summarized deal notes into CRM records.
- Developed asynchronous **Telegram bots and ETL pipelines** using Python (aiogram, asyncio, Telethon), processing high-volume customer inquiries and file transfers.
- Orchestrated multi-service workflows via **n8n** connecting Bitrix24, Google Workspace APIs, external relational databases, and notification channels.
- Integrated Google Gemini and OpenAI LLM endpoints into corporate customer support, automating message classification and multilingual draft responses.

Avantis — Systems & Bitrix24 Technical Specialist

Moscow | Apr 2021 – Aug 2022

- Administered self-hosted Bitrix24 on Linux; configured custom business processes, automation triggers, user access permissions, and external REST API integrations.
- Provided L2/L3 technical support, resolved hardware and network issues, and authored standard operating procedures (SOPs) for business teams.

Speedcast / Germsat · Intravision · Russian Post — Enterprise IT Systems Administrator 2009 – 2021

- 12+ years administering corporate IT infrastructure: Windows Server, Active Directory (GPO, DNS, DHCP), MS Exchange, and Hyper-V virtualization.
- Managed network equipment (Cisco, Mikrotik switches/routers), configured VLANs, firewall policies, IP telephony, and satellite communication equipment (Speedcast).
- Maintained relational database servers (MS SQL, PostgreSQL) and developed administrative automation scripts using PowerShell and Bash.

KEY TECHNICAL PROJECTS

- **Autonomous AI Job Search Assistant (Python / SQLite / Playwright):** Full-stack agentic system that continuously discovers vacancies across 6+ platforms, analyzes JD technical stacks, evaluates eligibility, and automates customized applications and employer notifications.
- **Reels / Video Content Analyzer (Python / Redis / ARQ / PostgreSQL / Docker):** Asynchronous video analysis pipeline accepting social URLs, extracting audio transcripts, fact-checking claims with web APIs, and delivering structured markdown reports.
